

BURGUNDY
GLAZED PORCELAIN STONEWARE

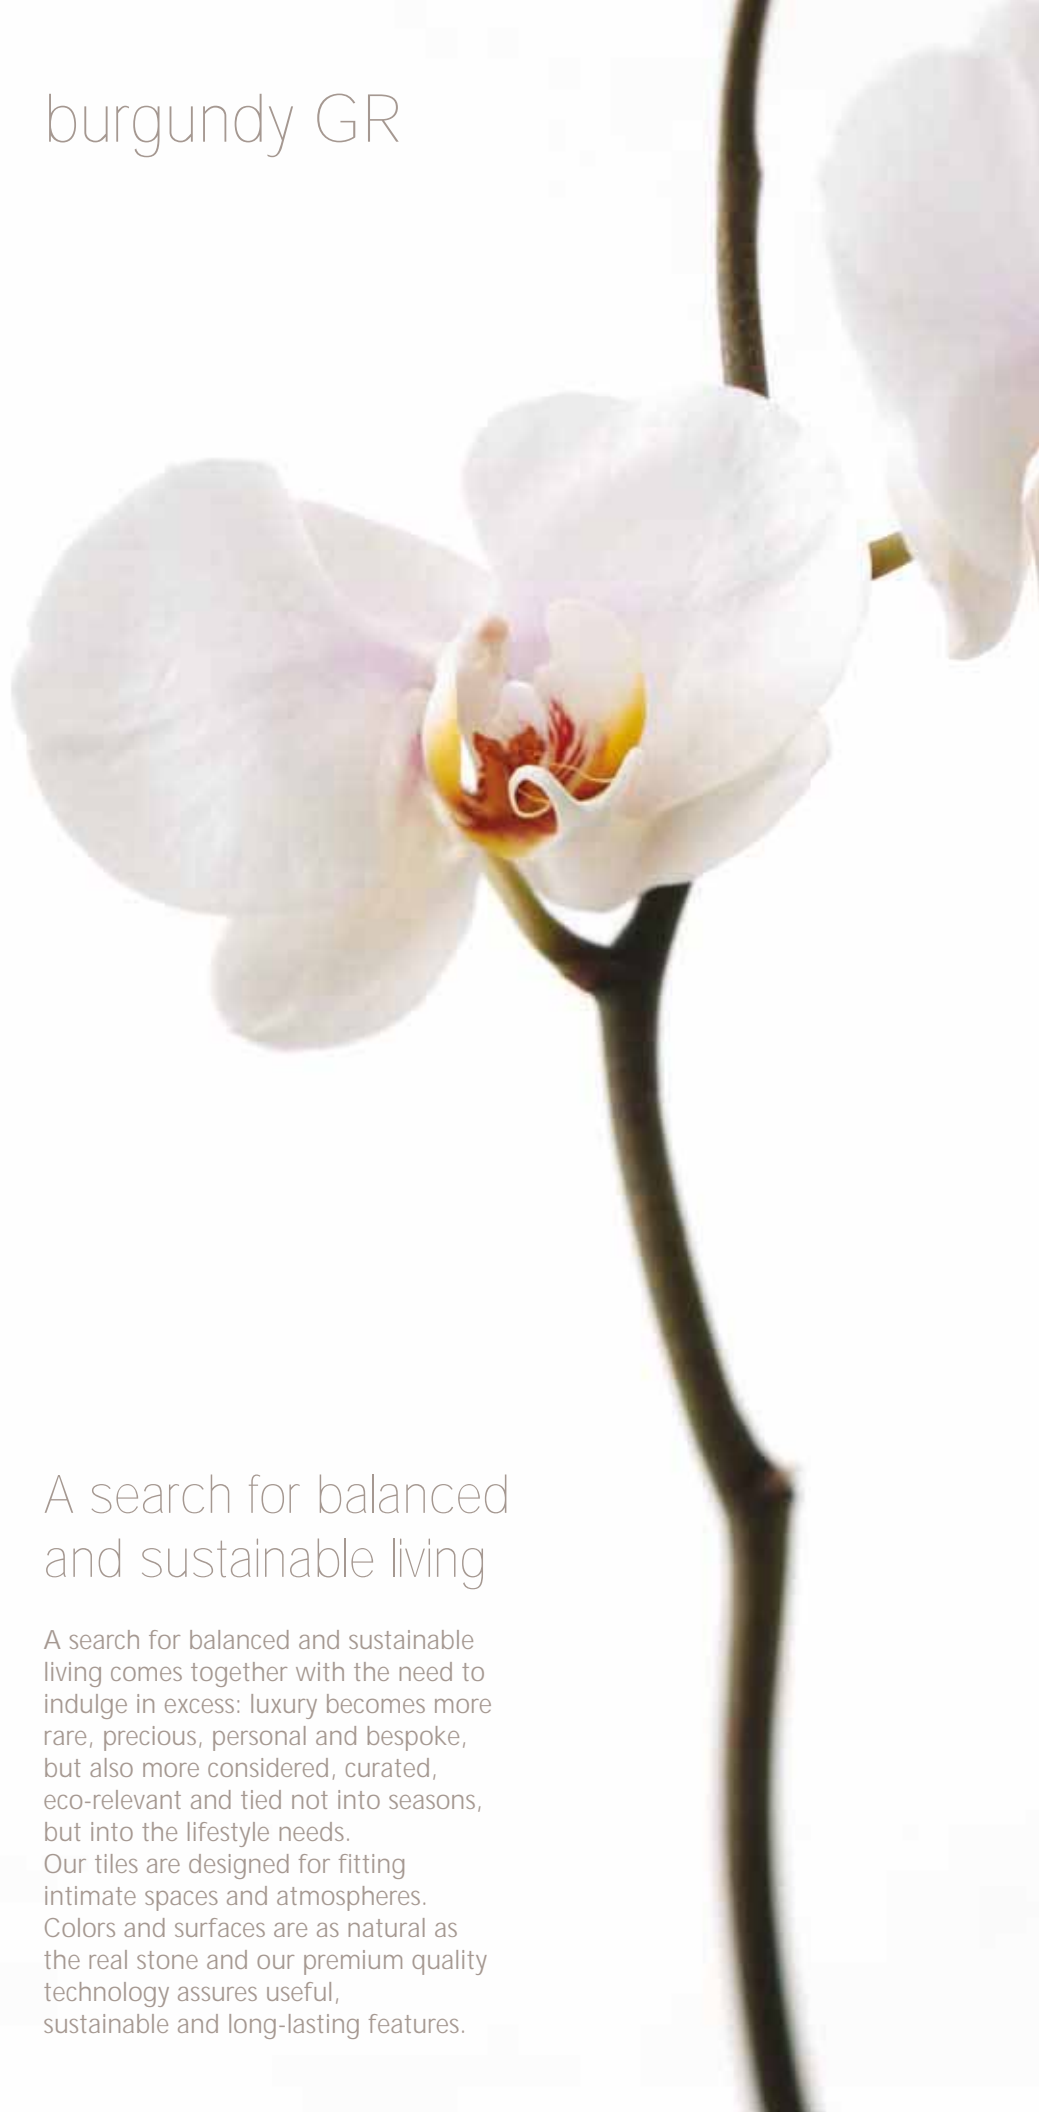

We are slowing down our pace, in search of peace, re-investing our lives with a sense of value and spiritual worth. Our homes become our nests: this is where we become like birds gathering objects and textiles, assembling matter, taken from nature, from our past and present experience, in order to rediscover local colors and Sunday design. From simplicity to luxury to fantasy to exuberance... our nest is an open-ended situation where we combine our inspirations, material and colors.

Embrace new organic, ethically and ecologically sourced atmospheres.

A search for balanced and sustainable living

A search for balanced and sustainable living comes together with the need to indulge in excess: luxury becomes more rare, precious, personal and bespoke, but also more considered, curated, eco-relevant and tied not into seasons, but into the lifestyle needs.

Our tiles are designed for fitting intimate spaces and atmospheres. Colors and surfaces are as natural as the real stone and our premium quality technology assures useful, sustainable and long-lasting features.

Taking inspiration from nature

We seem to be exploring our interests, enlarging our knowledge and further training our skills. We blend natural, rustic and exotic elements with man-made and technical skills, we feel free to recycle and remix. Burgundy takes inspiration from nature, recreates warm and shadowed surfaces, mixes the strength and durability of glazed porcelain stoneware, opens new possibilities for personal and exclusive designed interiors.

burgundy NO

Towards ethical and eco consciousness

A Nu-Austerity mindset: in a world of plenty and of rising disposable incomes, it is a decision to conspicuously abstain from buying not long lasting goods for having instead things with an ethical social, civic and eco conscience. Burgundy is a porcelain stoneware with superior physical and mechanical properties while respecting the environment in which we live. An encounter between materials, furniture and architecture creates a spatial dimension of austere uniqueness.

Looking for intimacy:
to be with our
objects of desire

Looking for intimacy: to share the good things of life, to be with our animals, plants and objects of desire, re-investing in local concerns, hand-made and natural design. The combination of patterns and colors creates 3-dimensional effects in the Burgundy tile body and surface, enlarging the expressive potentiality of this product: a robust and resilient stone with a deceptive surface that is lived-in and warm.

Shade variations

The color and shade of all tiles vary to some degree. This variance can be from piece to piece and can also occur from production run to production run.

American National Standard Specifications for Ceramic Tile (ANSI) has implemented a guide that rates ceramic tile on a five-point scale and ranges from V0 through V4.

Instituting the ANSI's color shade variation guidelines you will reduce customer complaints and sell the unique and individual beauty of each ceramic tile.

V0 Very Uniform Appearance

Pieces of the same shade value are very uniform and smooth in texture.

V1 Uniform Appearance

Differences among pieces from the same production run are minimal.

V2 Slight Variation

Clearly Distinguishable differences in texture and/ or pattern within similar colors.

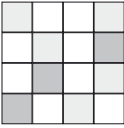

V3 Moderate Variation

While the colors and or texture present on a single piece of tile will be indicative of the colors and/or texture to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.

V4 Substantial Variation

Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or texture from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

SHADE VARIATION AND APPLICATIONS

V3  MODERATE VARIATION		Residential	Commercial	Industrial
	Floor	•	•	
	Wall	•	•	•
	Countertop	•	•	•
	Pool	•	•	•

Water, oil, grease, or other fluids create slippery conditions. Floors with exposure to these conditions require extra caution in product selection and proper maintenance.

Care & Maintenance

Burgundy is a stain-resistant porcelain tile. Routine maintenance will keep your tile looking new for years to come.

Ragno USA’s products are typically easy to install and maintain using the following general guidelines:

- Choose tile from same dye lot and caliber whenever possible
- Select tile alternately from several boxes and rotate when installing
- Follow industry-accepted installation practices as detailed by Tile Council of America “Handbook for Ceramic Tile Installation” or those recommended by the Ceramic Tile Institute of America
- Remove all grout residue promptly after application; neither acid cleaning nor sealing is recommended
- Clean regularly with clear water and/or a neutral (soapless) cleaner, wipe dry to lessen slippery conditions
