

Natural Refinement

Revision is the porcelain tile par excellence.

Its very high quality and attention to detail are synonymous with contemporary design.

A collection made of new, large formats suitable for interiors matching creatively tradition and modernity. Definite contrasts for those who wish to be daring with style and originality.

The main feature is a simple and informal refinement, never showed off. A fil-rouge running through the whole collection, an exciting path through metropolitan interiors matching successfully strong impact and natural elegance.

In the kitchen, the red floor 24" x 24" is the ideal setting of a customized furnishing, consisting of design objects.

A Matter of Style

Revision expresses itself at its best with the endless game of the tile bedding. In the living room, the white floor 12" x24" with the fishbone bedding is enhanced by the matching striped edge. An essential pattern, a surface catching the light, for those who prefer a scenographic, creative, but not eccentric style.

New, warm colours underline the richness of the waxy finish. The two-colour cladding is completed by the black edge of the same format and the thick joint in evidence. The luxury of a rich floor becomes a habit, thanks to Revision's strong versatility.

Shabby Chic

The living room, furnished with recycled pieces, is enhanced by the brown and black striped floor. A warm and welcoming interior, where the understated finishes and the salvaged pieces of furniture produce a shabby chic atmosphere.

The large format 12" x 48" of the Revision collection creates a continuous panelling and a uniform look which amplify the space perception. The waxy surface recalls a piece of craftsmanship. The interior design is informal, but nothing is left to chance.

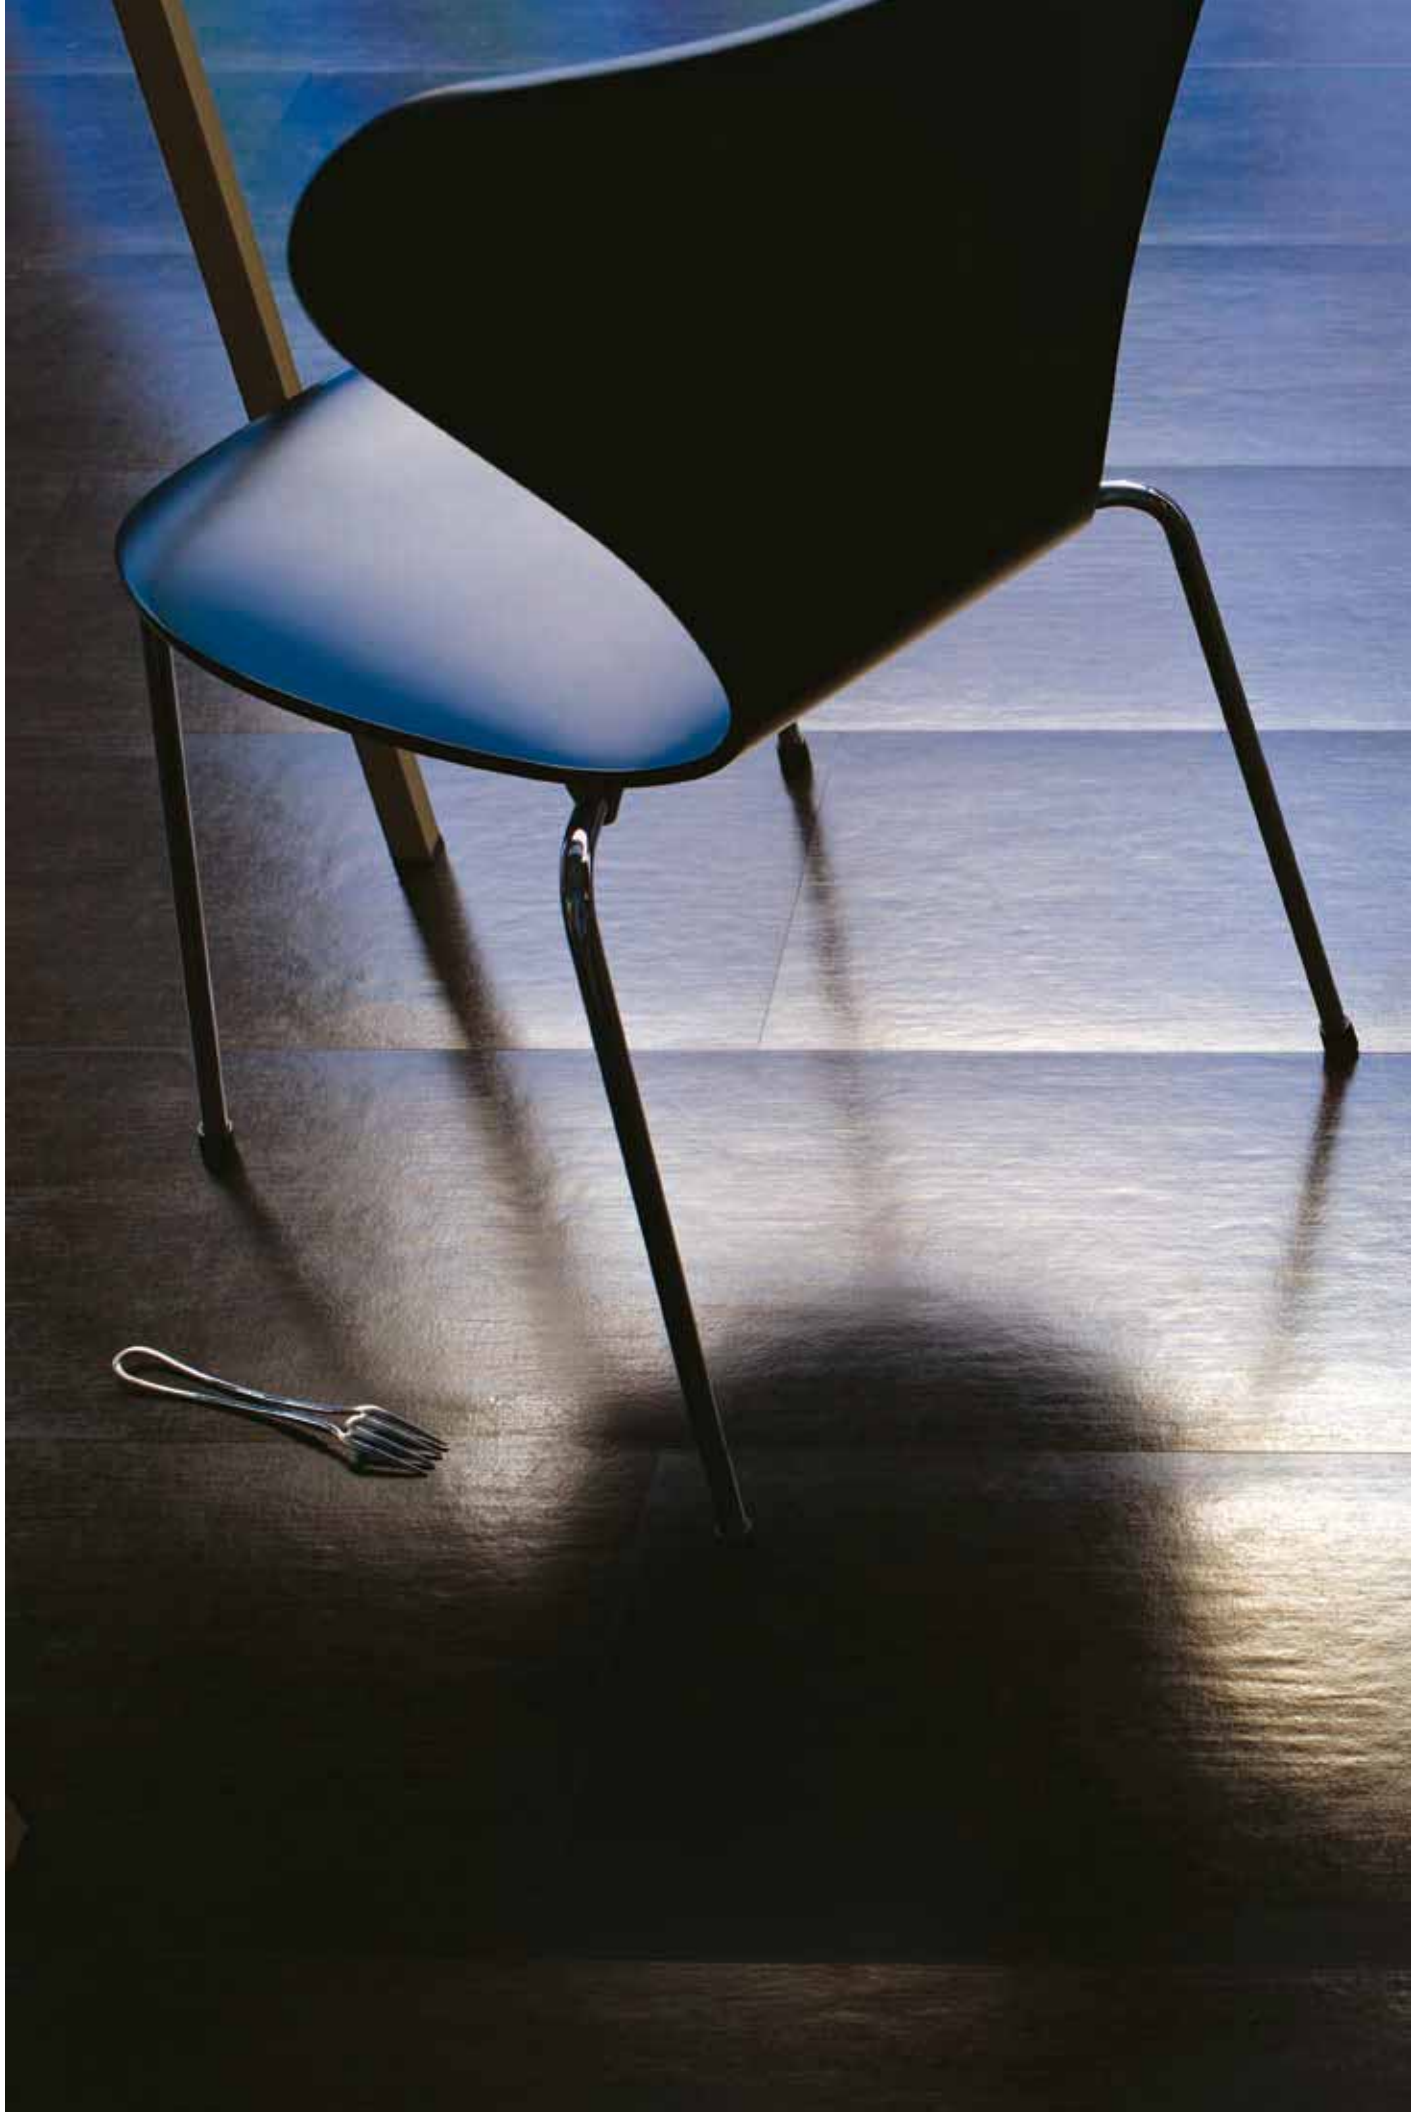

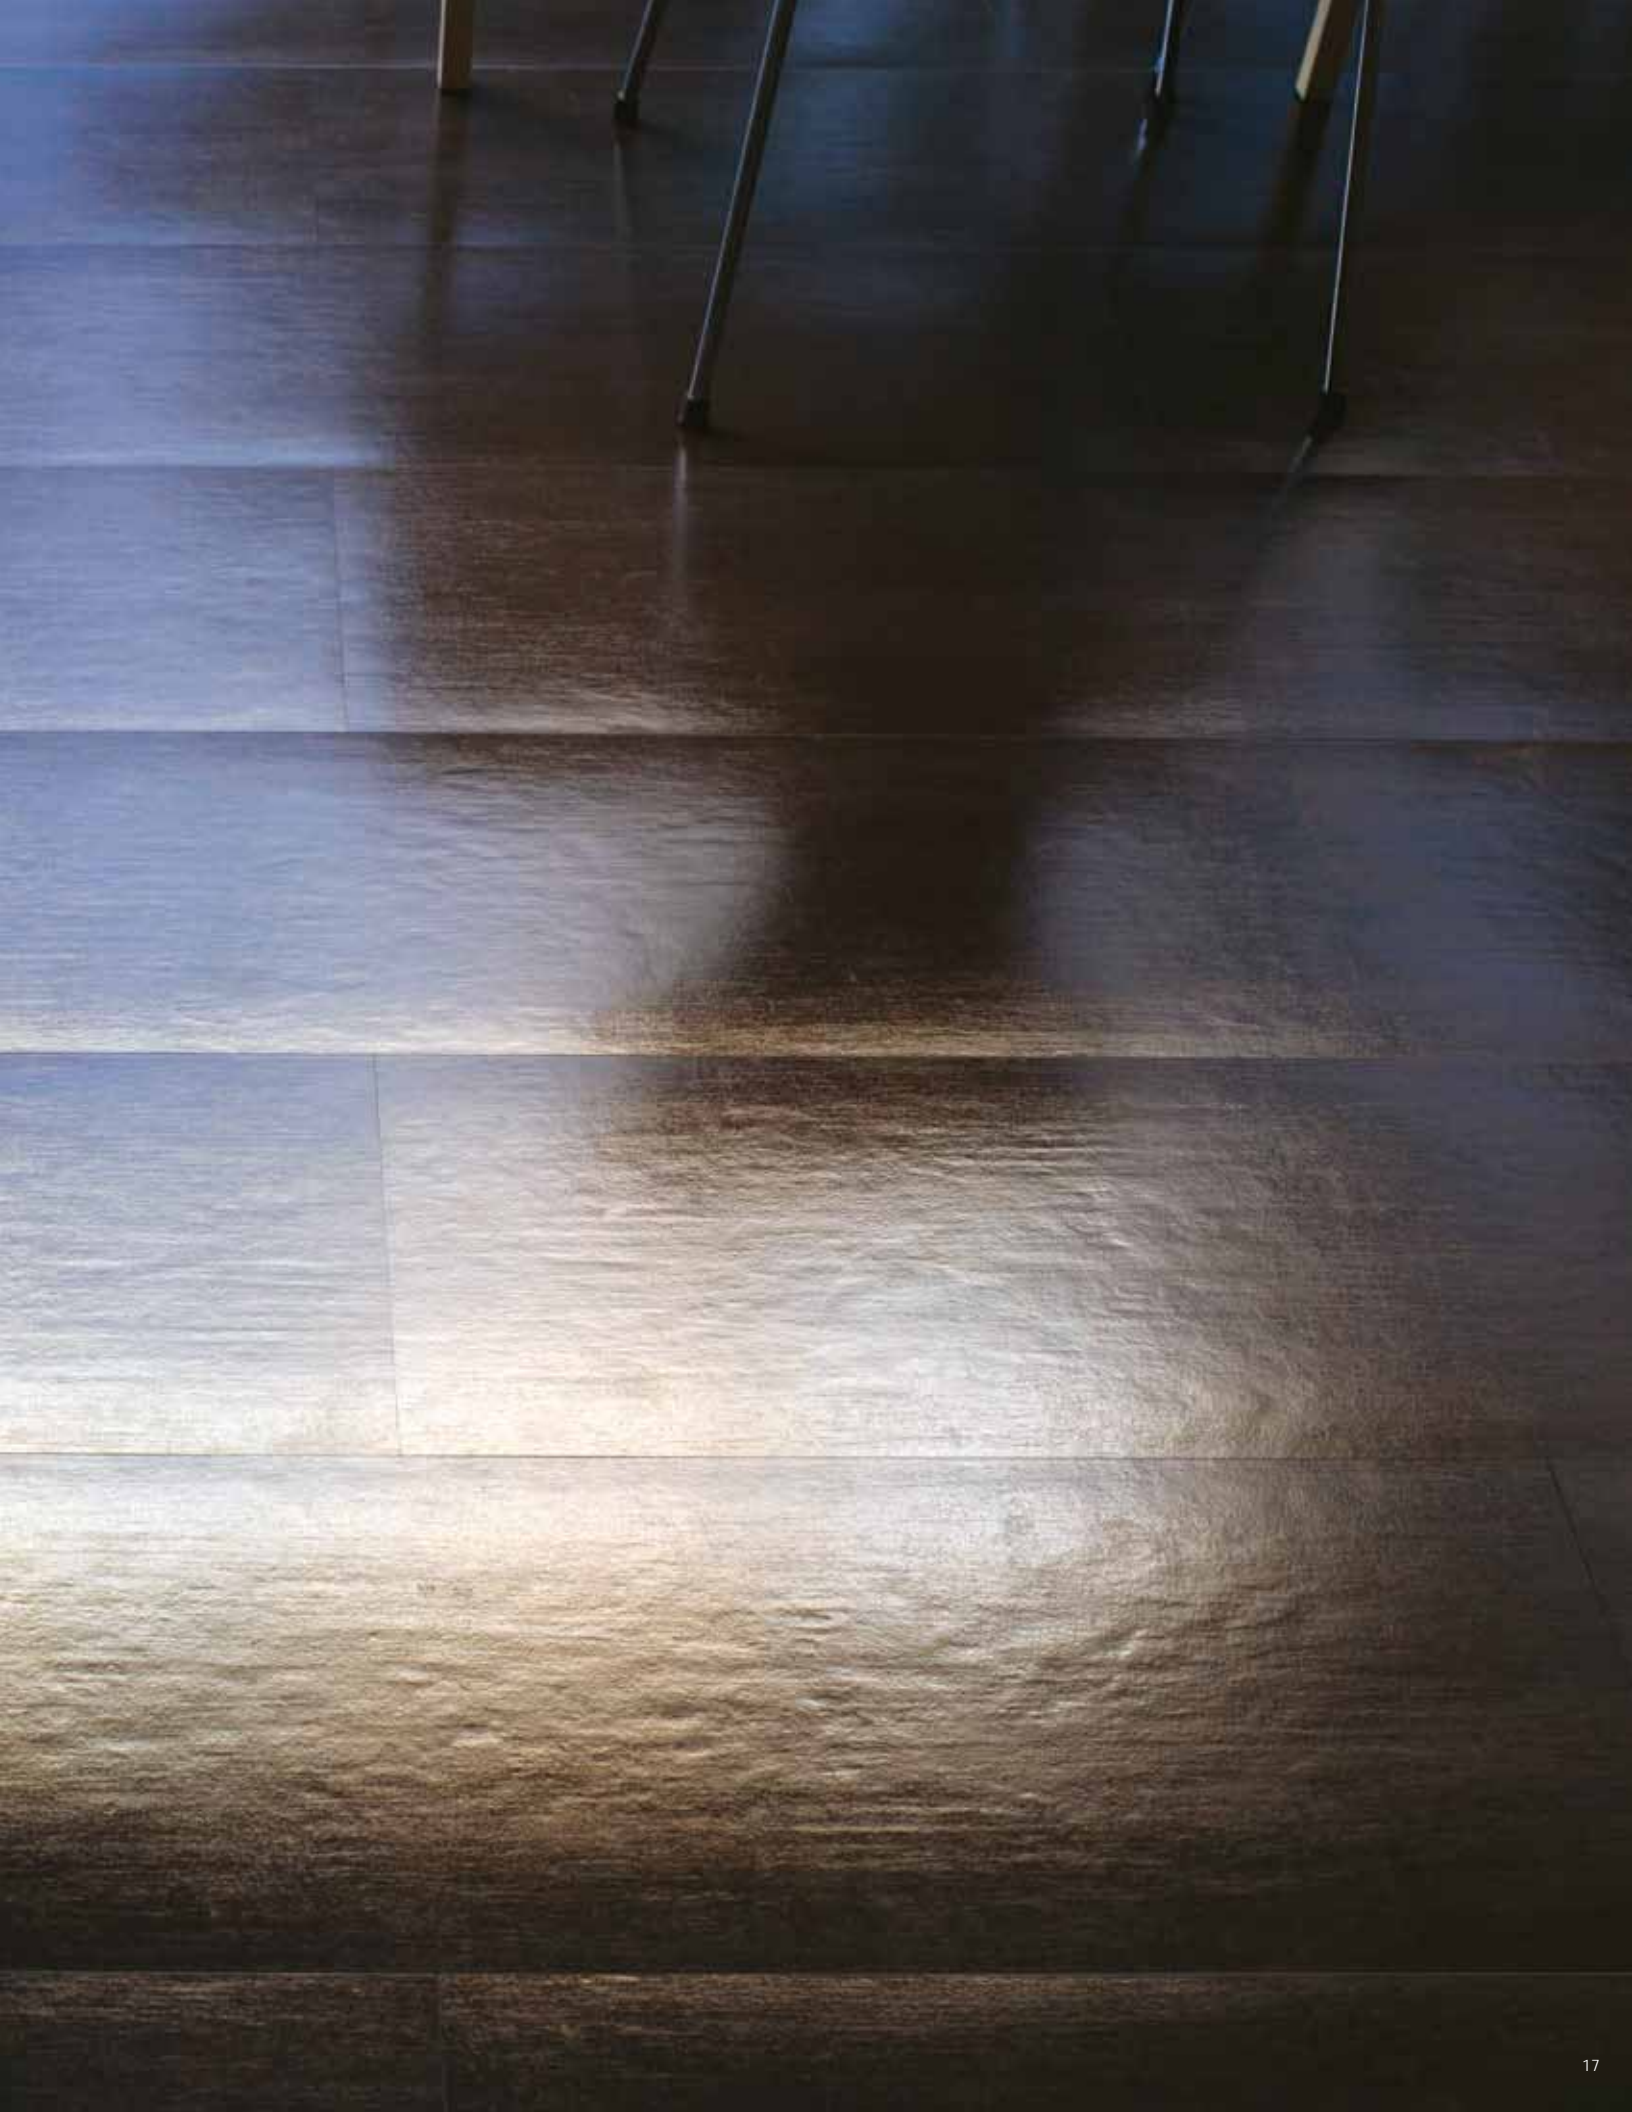

Noir Glamour

Bathroom becomes a space full of allure and glamour. The black boiserie made of Revision stripes emphasizes the vertical dimension of the room. The black floor and painted metal basin as well as vintage style furniture complete the original noir atmosphere.

The contemporary home is the personal expression of who lives in this home. A room of one's own is the place to relax, to take care of oneself or, simply, the room of silence. Revision, with its soft colors, helps to design a personal and intimate space.

Fusion Places

Nowadays the multifunctional spaces are the focus of social life, where to meet people, go for dinner, read and do some shopping.

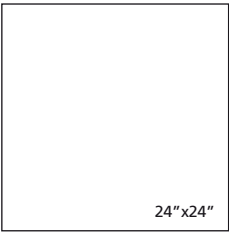

The interior design is radical, always hunting for new stimulant expressions. Revision is compatible with this trend; its decoration is a mix of slightly ethnic look and pictorial flair.

Nest, with its decoration, recalls a primitive style, very contemporary. The waxy surface reflects the light producing a textured, almost blurred effect. Colours are warm and earthy, they perfectly match with the eclectic pieces of furniture.

Shade variations

The color and shade of all tiles vary to some degree. This variance can be from piece to piece and can also occur from production run to production run.

American National Standard Specifications for Ceramic Tile (ANSI) has implemented a guide that rates ceramic tile on a five-point scale and ranges from V0 through V4.

Instituting the ANSI's color shade variation guidelines you will reduce customer complaints and sell the unique and individual beauty of each ceramic tile.

V0 Very Uniform Appearance

Pieces of the same shade value are very uniform and smooth in texture.

V1 Uniform Appearance

Differences among pieces from the same production run are minimal.

V2 Slight Variation

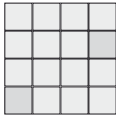

Clearly Distinguishable differences in texture and/ or pattern within similar colors.

V3 Moderate Variation

While the colors and or texture present on a single piece of tile will be indicative of the colors and/or texture to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.

V4 Substantial Variation

Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or texture from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

Water, oil, grease, or other fluids create slippery conditions. Floors with exposure to these conditions require extra caution in product selection and proper maintenance.

Care & Maintenance

Revision is a stain-resistant porcelain tile. Routine maintenance will keep your tile looking new for years to come.

Ragno USA's products are typically easy to install and maintain using the following general guidelines:

- Choose tile from same dye lot and caliber whenever possible
- Select tile alternately from several boxes and rotate when installing
- Follow industry-accepted installation practices as detailed by Tile Council of America "Handbook for Ceramic Tile Installation" or those recommended by the Ceramic Tile Institute of America
- Remove all grout residue promptly after application; neither acid cleaning nor sealing is recommended
- Clean regularly with clear water and/or a neutral (soapless) cleaner, wipe dry to lessen slippery conditions
